DARWINBOX · ASSIGNMENT 2 · COHORT C49

HireIQ

AI-Powered Hiring Intelligence

Stop guessing who will succeed. Start knowing.

PRODUCT	USER	AI TYPE	AUTHOR
Darwinbox	HR Manager	LLM + RAG	Abhishek Jha

Bad hires are invisible until it is too late.

HR Managers make hiring decisions using resumes, interviews, and gut instinct.

The data that would actually predict success — how similar past employees performed — already lives inside Darwinbox.

But it is never surfaced during the hiring decision.

This is not a pricing problem.
It is a decision intelligence problem.

THE COST

Entry Level	50%	of annual salary
Mid Level	100%	of annual salary
Senior Level	200%	of annual salary
Leadership	400%	of annual salary

P

Priya Sharma

HR Manager · TechCorp India · 1,800 Employees

80–120	60%	20%	₹15–40Cr
Hires per year	Time on hiring	Current mis-hire rate	Annual bad-hire cost

😤 *"I make the best decision I can. But I never really know if I'm right until 12 months later."*

🤔 *"I've hired the same profile twice for the same manager — completely different outcomes. I don't know why."*

📊 *"The data exists. I just can't see it when I need it most — at the moment of the hiring decision."*

Introducing HireIQ

Three AI-powered features that turn Darwinbox's own historical data into predictive hiring intelligence:

01 Candidate Success Score

ML Model — Supervised Classification

AI probability score (0–100%) predicting candidate success based on patterns from similar past hires inside your organization.

02 Manager Fit Intelligence

ML Model — Manager Pattern Analysis

AI signal showing how well a candidate aligns with the hiring manager's team patterns — based on historical retention and performance data.

03 AI Hiring Assistant

LLM + RAG — Darwinbox Data

Conversational AI answering HR manager questions using the organization's own Darwinbox data — in natural language, in seconds.

CANDIDATE PROFILE

Rahul Verma

Senior Product Manager · 6 years exp

SUCCESS SCORE

High Confidence

84%

vs avg hire in this role: 71% · +13pts above benchmark

WHY THIS SCORE

- ✓ Strong role-to-skills match (94%)
- ✓ 3 similar profiles averaged 20-mo tenure
- ✓ Positive interview score pattern

How It Works

01 Historical Data

Model trained on past hires — performance at 12 months, tenure, attrition patterns

02 Feature Matching

Candidate profile matched against 47 success factors from your top performers

03 Score + Explanation

Success probability with confidence band and top 3 contributing factors

04 Benchmark Context

Score shown vs average for this role — gives HR manager calibration

P0.2 · MANAGER FIT INTELLIGENCE

HIGH FIT Manager: Arun Mehta · Engineering Team

"Arun's team retains 78% of hires at 12 months. Candidates with strong execution skills and cross-functional experience perform best under this manager."

78%	22 mo	12
12-mo Retention	Avg Team Tenure	Past Direct Reports

Privacy Design: Aggregated team data only.
Individual records never exposed.

Bias Guardrail: Demographic attributes fully excluded from all model features.

Minimum bar: 5 past direct reports required before signal is shown.

P0.3 · AI HIRING ASSISTANT

Powered by LLM + RAG on your Darwinbox data

HR Manager

How did our last 5 hires for this role perform at 6 months?

HireIQ AI

Based on 5 employee records: 4 rated 'exceeds expectations' at 6 months. Avg tenure 18 months. Source: Performance data 2022–2024.

HR Manager

Any red flags in this candidate's profile?

HireIQ AI

One flag: 2 roles under 12 months in last 4 years. 3 of 8 similar profiles showed early exit. Confidence: Medium. Treat as one signal.

Read-only · Cites sources · Flags uncertainty · Sensitive queries escalated

The RAG Flow — How HireIQ Answers Questions

01
Ingestion
Nightly batch

Employee records → chunked into semantic units → embedded → stored in vector DB

02
Query
Real-time

HR Manager question → embedded using same model → top-k relevant chunks retrieved

03
Generation
< 3 seconds

Context + query → LLM with system prompt → grounded answer with citation

04
Display
Instant

Answer + source count + confidence level + sensitive topic flag if needed

AI advises. HR Manager decides. Always. — Every recommendation requires explicit human confirmation before any action is taken.

NORTH STAR METRIC

12-Month Hire Success Rate

Target: +15% improvement over baseline within 6 months of full rollout

Secondary Metrics

Success Score CTR — Adoption
> 70% HR managers view score

AI Assistant Query Rate — Engagement
> 3 queries per hire decision

Override Rate — Trust
< 30% of scores overridden

Time to Shortlist — Efficiency
Decrease by 20%

Guardrail Metrics

Demographic Parity
Threshold: Within 5% across all groups
→ *Auto-pause + legal alert*

Override Rate Spike
Threshold: > 40% in 30 days
→ *Model review in 5 days*

AI Answer Accuracy
Threshold: > 20% flagged inaccurate
→ *RAG pipeline review*

Model Latency
Threshold: > 2s P95 load time
→ *Engineering sprint*

Hiring AI carries real risks. We designed for them from day one.

Bias Audit Pre-Launch

Demographic parity tested across gender, age, and tenure groups before any HR manager sees a score. Zero tolerance policy.

Human Always in Loop

AI advises. HR Manager decides. No hire or reject decision can be made by AI alone. Employment law compliance by design.

Explainability First

Every score shows top 3 contributing factors. Every RAG answer cites its source. 'The AI said so' is never acceptable.

Privacy by Design

Manager Fit uses aggregated data only. Individual records never exposed. DPDP Act 2023 compliance built in from architecture stage.

Auto-Pause Guardrails

If demographic parity drops below threshold — feature pauses automatically. PM + Legal notified within 24 hours.

Regulatory Readiness

EU AI Act (High Risk category). NYC Local Law 144 bias audit. EEOC guidelines. Documentation ready for all three.

Phased Rollout

Shadow Mode

Wk 1–8

All 3 features run silently. Validate model accuracy.

✓ Recall > 70%

Design Partners

Wk 9–12

3 opt-in enterprise clients. HR managers only.

✓ NPS > 40

25% Rollout

Wk 13–18

Controlled expansion. All P0 features live.

✓ +5% conversion

Full Launch

Wk 19+

All enterprise clients. Feedback loop active.

✓ +15% hire success

HireIQ transforms Darwinbox from

"A system that records who you hired" → "A system that knows who will succeed"

Candidate Success Score + Manager Fit Intelligence + AI Hiring Assistant = The intelligent hiring layer Darwinbox has never had.
